As you are viewing this program on SBS and head trauma, keep a running list of potential consequences/injuries victims may suffer as a result. Include both short term and long term.

The host of the show discusses some misconceptions and problems about SBS.

#1: The term **shaken** implies...

...the truth...

#2: The term **baby** implies...

...the truth is ...

#3: The term **syndrome** implies...

...the truth is...

Statistically speaking...

Almost \_\_\_\_\_ in \_\_\_\_\_ parents of children under two admit that they or their partner have shaken a child. This equals \_\_\_\_\_ children in the United States under the age of 2 times 1% totaling and estimated \_\_\_\_\_ children shaken.

The above numbers do not include...

Factors that can lead to shaking include...

When a child is shaken, this is what happens...

- Head moves like an \_\_\_\_\_
- Neck muscles are \_\_\_\_\_ while their head is \_\_\_\_\_ compared to their body.
- The head goes through a large amount of \_\_\_\_\_.
- The \_\_\_\_\_ hits their \_\_\_\_\_ and the back of their will hit their \_\_\_\_\_.
- All of this can lead to...

Coping Skill/Strategies include...
